

# Bingjie Wang

Department of Astrophysical Sciences  
Princeton University

bjwang@princeton.edu  
<https://wangbingjie.github.io>

## RESEARCH INTERESTS

---

Galaxy formation and evolution, stellar populations, reionization; Bayesian inference, machine learning

## EDUCATION

---

### Johns Hopkins University

Baltimore, MD

Ph.D. in Astronomy & Astrophysics

2016–2021

- Thesis: “Implications for the Epoch of Reionization in the Local Universe”
- Advisor: Prof. Timothy Heckman

### University of Pittsburgh

Pittsburgh, PA

B.A. in Philosophy, B.Phil. in Physics with honors, *Magna Cum Laude*

2012–2016

- Thesis: “Evaluating the Standard Model of Cosmology in Light of Large-scale Anomalies in the Cosmic Microwave Background”
- Advisor: Prof. Arthur Kosowsky

## PROFESSIONAL POSITIONS

---

**NASA Hubble Fellow**, Princeton University

2025–present

- Faculty host: Prof. Jenny Greene

**Assistant Research Professor**, The Pennsylvania State University

2024–2025

**Postdoctoral Scholar**, The Pennsylvania State University

2022–2024

- Main focus: spectral energy distribution modeling of high redshift galaxies and little red dots
- Mentor: Prof. Joel Leja

## PUBLICATIONS

---

12 as first author, 81 in total (as of 07/2025).

For first-author only: h-index = 10, citations > 590; [ADS](#).

For all publications: h-index = 37, citations > 4900; these are listed in a separate section at the end; [ADS](#).

### First Author

- <sup>1</sup>**B. Wang**, J. Leja, et al., “Population Models for Star Formation Timescales in Early Galaxies: The First Step toward Solving Outshining in Star Formation History Inference”, *ApJ* **987**, 184 (2025).
- <sup>2</sup>**B. Wang**, A. de Graaff, et al., “RUBIES: JWST/NIRSpec Confirmation of an Infrared-luminous, Broad-line Little Red Dot with an Ionized Outflow”, *ApJ* **984**, 121 (2025).
- <sup>3</sup>**B. Wang**, J. Leja, et al., “RUBIES: Evolved Stellar Populations with Extended Formation Histories at  $z \sim 7 - 8$  in Candidate Massive Galaxies Identified with JWST/NIRSpec”, *ApJL* **969**, L13 (2024).

- <sup>4</sup>**B. Wang**, J. Leja, et al., “Quantifying the Effects of Known Unknowns on Inferred High-redshift Galaxy Properties: Burstiness, IMF, and Nebular Physics”, *ApJ* **963**, 74 (2024).
- <sup>5</sup>**B. Wang**, J. Leja, et al., “The UNCOVER Survey: A First-look HST+JWST Catalog of Galaxy Redshifts and Stellar Population Properties Spanning  $0.2 \lesssim z \lesssim 15$ ”, *ApJS* **270**, 12 (2024).
- <sup>6</sup>**B. Wang**, S. Fujimoto, et al., “UNCOVER: Illuminating the Early Universe—JWST/NIRSpec Confirmation of  $z > 12$  Galaxies”, *ApJL* **957**, L34 (2023).
- <sup>7</sup>**B. Wang**, J. Leja, V. A. Villar, and J. S. Speagle, “SBI<sup>++</sup>: Flexible, Ultra-fast Likelihood-free Inference Customized for Astronomical Applications”, *ApJL* **952**, L10 (2023).
- <sup>8</sup>**B. Wang**, J. Leja, et al., “Inferring More from Less: Prospector as a Photometric Redshift Engine in the Era of JWST”, *ApJL* **944**, L58 (2023).
- <sup>9</sup>**B. Wang**, J. Leja, A. Villar, and J. S. Speagle, “Monte Carlo Techniques for Addressing Large Errors and Missing Data in Simulation-based Inference”, *ML4PS, NeurIPS* (2022).
- <sup>10</sup>**B. Wang**, T. M. Heckman, et al., “The Low-redshift Lyman-continuum Survey: [S II] Deficiency and the Leakage of Ionizing Radiation”, *ApJ* **916**, 3 (2021).
- <sup>11</sup>**B. Wang**, T. M. Heckman, G. Zhu, and C. A. Norman, “A Systematic Study of Galactic Outflows via Fluorescence Emission: Implications for Their Size and Structure”, *ApJ* **894**, 149 (2020).
- <sup>12</sup>**B. Wang**, T. M. Heckman, et al., “A New Technique for Finding Galaxies Leaking Lyman-continuum Radiation: [S II] Deficiency”, *ApJ* **885**, 57 (2019).

## Second/Third Author

- <sup>13</sup>P. van Dokkum, G. Brammer, **B. Wang**, J. Leja, and C. Conroy, “A Massive Compact Quiescent Galaxy at  $z = 2$  with a Complete Einstein Ring in JWST Imaging”, *Nature Astronomy* **8**, 119–125 (2024).
- <sup>14</sup>S. Fujimoto, **B. Wang**, et al., “UNCOVER: A NIRSpec Census of Lensed Galaxies at  $z = 8.50 - 13.08$  Probing a High-AGN Fraction and Ionized Bubbles in the Shadow”, *ApJ* **977**, 250 (2024).
- <sup>15</sup>H. Atek, I. Chemerynska, **B. Wang**, et al., “JWST UNCOVER: Discovery of  $z > 9$  Galaxy Candidates Behind the Lensing Cluster Abell 2744”, *MNRAS* **524**, 5486–5496 (2023).
- <sup>16</sup>D. J. Watts, **B. Wang**, et al., “A Projected Estimate of the Reionization Optical Depth Using the CLASS Experiment’s Sample Variance Limited E-mode Measurement”, *ApJ* **863**, 121 (2018).
- <sup>17</sup>S. Aiola, **B. Wang**, et al., “Microwave Background Correlations from Dipole Anisotropy Modulation”, *PRD* **92**, 063008 (2015).
- <sup>18</sup>S. Aiola, A. Kosowsky, and **B. Wang**, “Gaussian Approximation of Peak Values in the Integrated Sachs-Wolfe Effect”, *PRD* **91**, 043510 (2015).

## PROPOSALS

---

- MUSE P116 (Co-I): The Lyman-alpha Halos of Little Red Dots: Does Dense Gas Fully Cover the Central Engines?
- JWST GO Cycle 4 (**PI**): Extremely Massive Galaxies in the Early Universe? Confirming the Nature of the Most Model-breaking Object by Hunting for Stellar Absorption Features
- JWST GO Cycle 4 (Co-I): MINERVA: Unlocking the Hidden Gems of the Distant Universe and Completing HST and JWST’s Imaging Legacy with Medium Bands
- JWST GO Cycle 4 (Co-I): Echoes of Silence: Absorption Line Spectroscopy of a Massive Quiescent Galaxy at  $z = 7.3$
- JWST GO Cycle 4 (Co-I): Give Me a Break: the Search for Stars in a Prototypical Little Red Dot

JWST GO Cycle 4 (Co-I): Studying Cosmic Noon at 200 parsec Scales: Resolved Spectroscopy of a Magnified Dusty Quiescent Galaxy

NOEMA (Co-I): Extremely Compact Galaxies at Cosmic Dawn: Ultra-massive Galaxies or AGN?

ALMA Cycle 11 (Co-I): Of Dust and Dots: ALMA's View of the Brightest of JWST's Little Red Dots

HST GO Cycle 32 (Co-I): Fulfilling the UV Legacy of the Hubble and Webb Deep Public Frontier Field

HST GO Cycle 32 (Co-I): Mg II Maps to Reveal How Ionizing Photons Escape Local LyC-emitting Galaxies

JWST GO Cycle 3 (Co-I): Clumpy Relics: The First Spectroscopic Confirmation of Globular Clusters at  $z \sim 3$

HST GO Cycle 31 (Co-I): The Optical Emission of the Highest Redshift Lens System

JWST GO Cycle 2 (Co-I): Medium Bands, Mega Science: Spatially-resolved Spectrophotometry of 50,000 sources at  $z = 0.3 - 12$

JWST GO Cycle 2 (Co-I): Extremely Massive Galaxies in the Early Universe: A Challenge to  $\Lambda$ CDM?

HST GO Cycle 30 (Co-I): Are There Two Classes of Lyman-leaky Galaxies?

HST GO Cycle 30 (Co-I): Resolving Lyman Alpha Emission in a Complete Sample of Lyman Continuum Leakers and Non-leakers

HST GO Cycle 30 (Co-I): The Lyman-alpha and Continuum Origins Survey

JWST GO Cycle 1 (Co-I): LyC22—Deep Spectroscopic Insights on Star-forming Galaxies 2.2 Gyr After the Big Bang

## SCIENCE TALKS (SELECTED)

---

Workshop on neural simulation-based inference, Statistical Methods for the Physical Sciences Research Center, Carnegie Mellon University ( <b>invited</b> )	10/25
Galaxy origins in the JWST era, Toledo, Spain	05/25
Big galaxies big problems, Lorentz Center	04/25
Special session on harnessing AI for advanced statistical inference in astrophysics, 245th meeting of the American Astronomical Society ( <b>invited</b> )	01/25
Astronomy colloquium, Kavli Institute for Astronomy and Astrophysics, Peking University ( <b>invited</b> )	12/24
Astronomy colloquium, Tsung-Dao Lee Institute, Shanghai Jiao Tong University	12/24
40th symposium, Institut d'Astrophysique de Paris	12/24
HEP-Astro seminar, University of Michigan ( <b>invited</b> )	10/24
Galaxies journal club, Space Telescope Science Institute ( <b>invited</b> )	10/24
Thunch, Galread, Princeton University	10/24
Galaxy lunch, Yale University	09/24
Astronomy colloquium, Pennsylvania State University	09/24
PHYSTAT—simulation based inference in fundamental physics, Max Planck Institute for Physics ( <b>invited</b> , declined due to a temporary visa issue)	05/24
SED fitting for JWST data, Pan-survey SED-fitting Forum ( <b>invited</b> )	01/24
ELT science in light of JWST, University of California at Los Angeles	12/23
Statistical challenges in modern astronomy VIII, Pennsylvania State University	06/23
Modern statistics of galaxies, Ludwig-Maximilians-Universität ( <b>invited</b> )	06/23

Cosmic connections: a ML $\times$ astrophysics symposium, Simons Foundation	05/23
Astronomy seminar, University of Pittsburgh ( <b>invited</b> )	03/23
Astrostatistics seminar, University of Toronto ( <b>invited</b> )	03/23
Astronomy seminar, University of Connecticut ( <b>invited</b> )	03/22
Dissertation talk, 237th meeting of the American Astronomical Society	01/21
Lunch talk, University of California at Berkeley	10/20
First light, University of São Paulo	08/19
Annual Sanielevici lecture, University of Pittsburgh	02/15
Workshop on large-scale anomalies, Case Western Reserve University	09/14
DAAD RISE scholarship holder meeting, Heidelberg, Germany	07/14
Neighborhood workshop, Pennsylvania State University	04/14

## PRESS

---

Based on lead-author works:

“Trio of early galaxies test our ideas of cosmic evolution”; Sky & Telescope	2024
“JWST discovery of ancient stellar populations in little red dots”; PSU release (Space.com, Universe Today, The Independent, ...)	2024
“Too many stars, too fast?”; AAS NOVA research highlights also featured in AAS Journal Series Author Series.	2024
“JWST discovery of the second- and fourth-most distant galaxies”; PSU release (Space.com, Newsweek, Daily Mail, ...)	2023
“JWST uncovers new details in Pandora’s Cluster”; NASA/STScI/PSU release	2023
“[S II] deficiency and the leakage of ionizing radiation”; AAS journal author series	2021
“Tracing gas flows out of star-forming galaxies”; AAS NOVA research highlights	2020

Expert comments for:

BBC, New Scientist, Sky & Telescope

Selected other press releases:

“NASA telescopes discover record-breaking black hole”; NASA release (CNN, ...)	2023
“Massive early galaxies defy prior understanding of the universe”; NASA/Nature/ANU/PSU release (CNN, The Guardian, NPR, ...)	2023

## PROFESSIONAL EXPERIENCE

---

Proposal review panelist for James Webb Space Telescope, Nancy Grace Roman Space Telescope	
Reviewer for JWST Director’s Discretionary proposal	
Reviewer for <i>Astronomy &amp; Astrophysics</i> , <i>The Astrophysical Journal</i> , <i>The Astrophysical Journal Letters</i> , <i>Nature</i> , <i>Nature Astronomy</i>	2021–

## MENTORING, TEACHING & OTHER SERVICE

---

Research advisor for:

Kanishk Pandey (graduate student, Penn State, 2024), Emilie Burnham (graduate student, Penn State, 2023–), Nathan Cristello (undergraduate student, Penn State, 2023)

Guest Lecturer, Penn State University 2023–2024

Graduate level: extragalactic astronomy

Undergraduate level: introduction to astronomy for non-majors

Graduate Teaching Assistant, Johns Hopkins University 2016–2018

Graduate level: astrophysical dynamics, radiative astrophysics

Undergraduate level: cosmology, general physics for biological science majors, general physics for physical science majors, general physics labs

Organizing committee for Neighborhood Workshop on Astrophysics and Cosmology, Penn State 2025

Climate and diversity committee, Penn State 2024

## HONORS AND AWARDS

---

Rodger Doxsey Travel Prize, American Astronomical Society 2020

First-prize poster, First Light at University of São Paulo 2019

$\Sigma\Pi\Sigma$  physics honors society initiate 2016

Thompson award for excellence in scientific writing, Physics & Astronomy, UPitt 2016

Halliday award for excellence in undergraduate research, Physics & Astronomy, UPitt 2015

Thomas-Lain fund scholarship, Physics & Astronomy, UPitt 2015

Research Internship in Science & Engineering, Deutschen Akademischen Austauschdienstes 2014

Sanielevici undergraduate research scholarship, Physics & Astronomy, UPitt 2014

## OPEN-SOURCE SOFTWARE

---

sbi\_pp: simulation-based inference customized for astronomical applications 

Prospector: bayesian inference of stellar population properties from photometric and/or spectroscopic data (contributor) 

blast: a web application for characterizing the host galaxies of astrophysical transients (contributor)
